Education

University of Utah   08/2020

BC: Full Stack Web Developer

Skills: CSS3, HTML, Javascript, JQuery, Node.JS,PHP, Express.JS, React.js, MySQL, Command Line, Git

Projects

Full Stack Developer , W&C Food Truck website

- Created a website for a food truck, you can look at the menu, order in advance, check the weather and the location.
- I came up with the idea of this food truck website and the design of the page, from the colors, pictures, menu and font.
- We used our HTML, CSS and Javascript skills to make this beautiful page, as a team we all contributed evenly on the amount of work we put in our code, I did spend more time fixing/debugging at the end to make sure it was working correctly with no errors.

Full Stack Developer, Day Planner
- You can add important events on the daily planner to keep your day to day life organized.
- Used HTML, CSS and JS, for this project i used the moment.js library to work with time and date.
